EDUCATION

Vellore Institute of Technology, Bhopal. <i>B.Tech - Computer Science and Engineering with AIML, CGPA: <u>8.32/10</u>,</i>	Sep 2020 – May 2024 <i>Bhopal, IND</i>
Maharana Mewar Public School, Udaipur [Class XII] <i>PCM with Computer Science, Higher Secondary, Grade <u>73.77%</u></i>	Apr 2018 – Mar 2020 <i>Udaipur, IND</i>
Saint Joseph's Secondary School, Mount Abu [Class X] <i>Class X, Senior Secondary, Grade: <u>90.60%</u></i>	Apr 2009 – Mar 2018 <i>MountAbu, IND</i>

SKILLS

Programming Languages: Java, Python, JavaScript, HTML/CSS
Frameworks: OpenCV, PyTorch, Tensorflow
Developer Tools: Git, GitHub, Windows, VSCode, Figma
Databases & Cloud: SQL, AWS
Languages: English, Hindi, Gujarati.
Others: Data Structures and Algorithms, Object-Oriented Language, Data Collection and Preprocessing, Data Analysis and Visualization, Model Training and Evaluation

Experience

Machine Learning Intern | NeuroNexusInnovations . Feb 2024 – Mar 2024
- Developed customer churn prediction model using logistic regression, gradient boosting, and random forests.
- Implemented spam/ham message identification system using TF-IDF vectors and Naive Bayes.
- Collaborated on data preprocessing, model evaluation, showcasing strong teamwork.

PROJECTS

Library Management System | PHP, SQL(Database), HTML,,CSS, JavaScript
- Designed and implemented a Library Management System handling a database of 5,000 books and serving 800 students.
- Facilitated 24/7 book requests, enhancing accessibility for students and increasing library throughput by 15%.

Heart Disease Prediction with CNN-BiLSTM and ECG Signal Analysis | Python, Tensorflow, keras, Matplotlib
- Developed an ensemble model integrating ECG, PCG, and vitals to predict CAD with a recall of 95%.
- Processed 500+ PCG samples into spectrograms for CNN-BiLSTM; analyzed 1,000+ ECG signals using CNN.
- Generated 2,000+ pseudo-data points to boost model accuracy and overall performance.
- Implemented data augmentation techniques and fine-tuned hyperparameters, improving precision by 8%

REM-Sleep-Classification | Python, Tensorflow, EDF, IDA
- Developed a predictive model achieving over 85% accuracy for REM sleep behavior disorder using ensemble methods on the EDF dataset, integrating 3 EEG and EMG metrics
- Implemented 4 classification algorithms (Naive Bayes, Random Forest, Logistic Regression, Gradient Boosted Trees) to enhance prediction performance by 20%.

CERTIFICATIONS

AWS Certified Cloud Practitioner/ AWS Credly Badge Score: 810/1000	Jul-2023
Google UX Designer Professional Certificate, Coursera Certificate	Sep-2022
HTML, CSS, and JavaScript for Web Developers, Coursera Certificate	Nov-2022

ACHIEVEMENTS

- AWS Certified Cloud Practitioner with a score of 810/1000.
- Won a blogging contest by Syncloop.ai and a prize worth Rs.8000.
- Contest Rating of 1741 on Leetcode.
- Solved 700+ questions on GFG and Leetcode.
